

Bel Aire Recreation- Covid 19 Program Requirements

This document is to give parents, participants, spectators, and community members information during the current Pandemic. It is understood that there will be questions and situations that arise, please understand that this document will be amended and updated as information becomes available. Bel Aire Recreation thanks everyone for your ongoing support, cooperation, and patience. We appreciate your understanding as we try and provide the safest environment as we can to continue to offer programs for our community. See the BA Rec Coronavirus Transmission Risk Mitigation document for additional information and program assistance.

Attendance: Do not come to a program if you are exhibiting any of the symptoms of Covid as listed here:

- | | | |
|---------------------|---|--|
| -Fever (100.4 or +) | -Cough | -Shortness of breath or difficulty breathing |
| -Chills | -Racing heart rate | -Body aches |
| -Dizziness | -Loss of taste or smell | -Nausea, vomiting, or diarrhea |
| -Sore throat | -Unusual rash or painful discoloration of fingers or toes | |

Participants must wear a mask to enter the facility and until it is time for them to be an active participant. At that point they may remove the mask if they desire. During games if a player is on sideline (not active) they will put their masks on. Once the activity is complete, they must put the mask back on while leaving the facility.

Coaches must wear a mask at all times. Coaches will complete their team's symptoms checks and record on team sheet at practices and games.

Officials and BA Rec staff must wear a mask at all times during activities. Hand operated whistles will be used.

Parents and spectators Currently we plan to allow spectators at games, but this may change if needed. Limits potentially may be placed on the number of attendees. Masks are required to & from facilities and when not able to social distance at least 6'.

Health: KDHE & CDC guidelines will be followed when dealing with participants and staff absent due to Covid symptoms. This could be up to a minimum of 10-14 days away from a program. If a participant exhibits symptoms of Covid while at an activity they will be removed from the activity and the group. Parents will be contacted to pick them up immediately.

Water: Participants are encouraged to bring a water bottle. Water fountains will not be available.

Covid Protocol

Prior to a Program, Practice or Game:

Participants with an underlying health condition should check with their doctor to determine if they should participate in an in-person program.

Parents will be responsible for screening their participant for symptoms of Covid-19 prior to attending a program. If symptoms or exposure is suspected, the participant should stay home in isolation for 10 days, be fever free for 72 hours before returning to the program, whichever is longer.

***The participant may be able to return to the program earlier if seen by a doctor and a different diagnosis is determined to the cause of the symptoms. A signed doctors' release will be required before returning to the program and given to the BA Rec office.

While at a Program, Practice or Game:

If a participant becomes ill while at a program with Covid-like symptoms the following measures will be put into place:

- Participants will be asked to put a mask on and removed from the program and group.
- Parents will be contacted and asked to pick up the participant immediately.
- If a participant or anyone around the program exhibits symptoms of Covid-19 without other obvious explanations will be sent home immediately. See the symptom list above under "attendance".

Return to Program After Exclusion:

The following conditions should be met for your participant to be able to return to the program.

- 1) Untested but having symptoms: Minimum of 10 days out of program. 10 days since symptoms first appeared and fever free for 72 hours, whichever is longer.
- 2) Tested and positive results:
Symptomatic cases: 10 days since symptoms firsts appeared and fever free for 72 hours, whichever is longer, meaning a minimum of 10 days.

Asymptomatic cases (no symptoms): 10 days have passed since the test was done and symptoms have not developed. If symptoms develop during that time, follow the above criteria for symptomatic cases.

- 3) Tested and negative results: May return to the program after fever/symptom free.

***The participant may be able to return to the program earlier if seen by a doctor and a different diagnosis is determined to the cause of the symptoms. A signed doctors' release will be required before returning to the program and given to the BA Rec office.

Communication with the Bel Aire Recreation office on anyone in these situations is required.

Known Exposure to Covid-19:

Household Contact: Must be quarantined for 14 days after the case been fever free for 24 hours and feeling well.

Non-Household Contact: Must be quarantined for 14 days from the date of last contact with the case

Travel Related Quarantine:

If you have traveled to a location listed on the KDHE travel related quarantine list, you must quarantine for a mandatory 14-day period starting from the day after you return to Kansas.
